Episode 1 The School Environment

SPARK Your Interest

This Episode 1 provides an opportunity for students to examine and reflect on a school environment that promotes learning and development.

TARGET Your Intended Learning

- At the end of this Episode, I must be able to determine the characteristics of a school environment that is safe, secure, and is supportive of learning (PPST 2.1.1).

REVISIT the learning Essentials

1. A physical environment conducive for learning is one that has consistent practices that:
 - keep the school safe, clean, orderly and free from distraction;
 - maintain facilities that provide challenging activities; and
 - address the physical social and psychological needs of the students.
2. Display boards can be powerful in communicating information about the learning environment. They help in building and establishing the school culture. These boards become one way for everyone to learn about the vision-mission, goals, and values that the school upholds.
3. As a basic part of the school's visual environment, display boards have four general purposes:
 - Decorative - They offer visual stimulation and appeal to aesthetics. They set the social and psychological atmosphere of the school.
 - Motivational - They encourage students to perform better and have greater confidence. An example would be the display of students' outputs that show that each output is recognized and valued. The bulletin boards help celebrate the learners' growth and progress.
 - Informational - They are used as a strategy to readily disseminate information.
 - Instructional - They move students to respond and participate through interactive displays. They get students to think about and communicate their learning.
4. The set of criteria for evaluating bulletin board displays includes effective

communication, attractiveness, balance, unity, interactivity, eligibility, correctness, and durability.

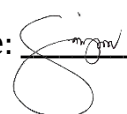

OBSERVE, ANALYZE, REFLECT

Activity 1.1

Exploring the school campus

Name of the FS Student: Jay John C. Yasis

Course: BSED Major in Sciences Year and Section: 4th Year Block A

Resource Teacher 1: Sir Kim Paolo Armin A. Torcelino VI Signature:  Date: 09/03/25

Cooperating School: Abaño Laboratory School

To realize the **Intended Learning Outcome**. Work my way through this steps:

- 1) Visit the school. Look into facilities and support learning areas in the campus. Then in the classroom.
- 2) Observe and used to check police as you move around the school premises.
- 3) Analyze and gather data about the school environment.
- 4) Reflect on the characteristics of a school environment that promotes learning.
- 5) Present your idea of a good school environment through any of these:
 - a) descriptive paragraph.
 - b) Photo essay
 - c) Sketch or drawing.
 - d) Poem, song or rap

OBSERVE

Move around the campus observation forms are provided for you to document or observations. It is advised that you read the entire word ship before proceeding to the school side. A good understanding of the activities and tasks to be accomplished in the activity sheets will yield better learning results.

SCHOOL FACILITIES OBSERVATION CHECKLIST

Familiarize yourself with the different areas and facilities of the school. Check the column to indicate their availability. Give a brief description of those that are available. And see how each will contribute to the students learning and development.

Facilities	✓	Description	Will it contribute to the students' learning and development. Why?
Office of the Principal	✓	The atmosphere inside the Principal's/Dean's office is formal yet welcoming, giving both a sense of authority and approachability. It is furnished with a desk, chairs for visitors, filing cabinets for important school documents, and a bookshelf filled with records. The office also has proper lighting, ventilation, and a bulletin board displaying school announcements.	Yes, it will contribute to the students' learning and development because the Principal's/Dean's office gives a balance of authority and professionalism. The way it is organized, with important documents, announcements, and even the welcoming setup, shows students the value of discipline, responsibility, and communication. It also makes them feel that the office is not just a place of authority, but also a space where they are supported and guided in their growth.

ON BECOMING A TEACHER

Episode 1 The School Environment

Library	√	As you enter the library, you are welcomed by a serene ambiance. Before the students can proceed to their agenda they must first log in using their library card at the scanner. A baggage area is provided where they can safely place their belongings. Inside are rows of tables with chairs, it offer the students spaces for reading and completing schoolwork. The library also has few computers with internet access and are available for students use. The library also provides free Wi-Fi for both students and faculty. What makes this library unique is its designated area where students can take a quick nap when they are tired, a thoughtful reminder that self-care is just as important as academics.	The availability of books, tables, computers, and internet access ensures that students have the resources to study, conduct research, and complete their schoolwork effectively. It will greatly contribute to students' learning and development because it provides a calm and organized environment that supports both academic and personal needs.
Counselling Room	√	The counseling room is located at the back of the school, in a quiet area away from noise and distractions, making it accessible yet private for both students and teachers who may need guidance. The atmosphere inside is warm, calm, and welcoming, creating a safe space where students can openly share their thoughts and feelings. It is equipped with comfortable chairs, a small table, bookshelves filled with self-help and educational materials. The room also has proper ventilation, good lighting, and a secure storage cabinet for confidential student records.	Yes, it will contribute to the students' learning and development because the counseling room provides a safe and supportive space where students can freely express themselves without fear of judgment. Its calm and welcoming atmosphere helps them feel at ease, while the resources inside, like self-help books and guidance materials encourage personal growth. More than just a room, it serves as a place where students can find comfort, guidance, and encouragement, which are all important in shaping the students' well-being and overall development.
Canteen/ Cafeteria	√	The canteen is located on the ground floor of the newly stablished building on the right side of the covered court. Inside are rows of tables and chairs fo students and facultys use. It is pleasing to the eye, clean and well ventilated. The canteen offers a variety of food to everyone, there are many food stalls inside that offers classic street foods,	Yes, it will contribute to the students' learning and development because the canteen is not just a place to eat but also a space where students can relax, interact, and build friendships. Its clean and welcoming environment gives

		deserts, beverages and morning to afternoon meals.	them comfort, while the variety of food available helps them stay energized throughout the day. By having a space that supports both their physical needs and social connections, the canteen becomes part of their overall growth and well-being.
Medical Clinic	√	The medical Clinic is located near the entrance gate, it is easily accessible to the students and teachers, its location is essential when an emergency occur. The atmosphere inside is very calm and quiet, making it soothing for those who need to rest or for someone in need of emergency medical attention. It is also equipped with basic necessary materials like bed, storage cabinets for emergency medicines, stretchers and also fire extinguisher.	Yes, it will contribute to the students' learning and development because the medical clinic provides them with a sense of safety and security while they are in school. Knowing that there is a calm and well equipped place to go in times of sickness or emergency allows students to focus more on their studies without worry. Its accessible location and caring atmosphere also teach the importance of health, safety, and preparedness, which are valuable lessons for their overall growth and well-being.
Audio visual/Learning resource center	X		
Science laboratory	√	The science laboratory is a clean and well-ventilated classroom, it is designed for effective learning and experimentation. It has sturdy tables and equipped with essential laboratory materials, well-calibrated instruments, and apparatuses safely stored in secured cabinets. It also has safety features such as sinks, an emergency shower, a first aid kit, and fire extinguishers available and strategically placed for quick access in case of emergencies.	The science laboratory helps students learn and grow by giving them a safe, well-equipped space to do hands-on experiments. With proper tools, accurate instruments, and safety equipment, they can explore science beyond theory while building critical thinking and problem-solving skills. Its clean and organized setup also teaches discipline, responsibility, and confidence. These are the skills they can use not just in school but in everyday life.

ON BECOMING A TEACHER

Episode 1 The School Environment

Gymnasium	√	The gym has many equipment for fitness, it includes a bench press machine, a lat pulldown machine, couple of treadmill machines, dumbbells set and many more. As far as I know it is not open for the students in basic education, but they are free to borrow some equipment whenever they need. It does open though for the member of the faculty if they want to work out after class. Overall it is full of clean, sturdy and well-maintained equipment always ready for use.	Yes, it will contribute to the students' learning and development because the gym encourages the value of physical fitness and healthy living. Even if it is mainly open for faculty, students who get the chance to use the equipment can learn the importance of discipline, strength, and taking care of their bodies. Having access to a space filled with clean and well maintained equipment also shows them the significance of responsibility and balance in life, which can shape not only their physical health but also their mindset and habits for the future.
Auditorium	X		
Outdoor/Garden	√	At the time of my observation/visit, I think there is no true garden in the school, but it has something that is somewhat like a garden. One is at the front of the faculty building, but it is under construction. There had been flowers, plenty of plants, and orchids before the construction began. The other outdoor garden is located at the back of the faculty building, but instead of orchids and flowers, it has a variety of vegetables like sili and sitaw.	Yes, it will contribute to the students' learning and development because having a garden, whether filled with flowers or vegetables, gives them a chance to appreciate nature and understand the importance of caring for the environment. It also teaches them patience and responsibility, especially when they see how plants grow and thrive with proper care. More than just adding beauty to the school, the garden can inspire students to value sustainability and nurture a deeper connection with the world around them.
Home Economics Room	√	The Home Economics room is well-organized, with equipment neatly arranged and cleaned, making it easy to find any material or tool when needed. It is also clean, well-ventilated, and properly lit.	Yes, it will contribute to the students' learning and development because the Home Economics room provides them with a space that encourages orderliness and responsibility.

			The way the tools and equipment are neatly arranged makes it easier for them to focus on learning skills without distraction. Its clean and comfortable environment also helps students feel motivated and ready to practice, shaping not just their abilities but also their appreciation for discipline and organization in daily life.
Industrial workshop area	X		
PTA Office	X		
Comfort room for boys	√	There are plenty of comfort rooms for boys available inside the school. In total, there are four, two of which feature modern technology, such as a flush button that lights up when pressed. These also have a minimalist and sleek design. The other two are more traditional, using a dipper, but they still provide a clean and well-maintained space.	Yes, it will contribute to the students' learning and development because having enough comfort rooms that are both clean and functional helps them feel at ease while in school. The mix of modern and traditional designs shows that the school values both innovation and practicality, ensuring that every student's needs are met. By maintaining these facilities properly, students also learn the importance of cleanliness, responsibility, and respect for shared spaces, which are lessons they can carry with them beyond the classroom.
Comfort room for girls	√	There are also plenty of comfort rooms for female students. They have four in total, two of which feature modern technology, such as a flush button that lights up when in use. The other two are designed in the traditional style, where a dipper is used. All of them are well-ventilated, well-maintained, and has proper lighting.	Yes, it will contribute to the students' learning and development because the availability of clean and well-maintained comfort rooms for female students gives them a sense of comfort and security while in school. The presence of both modern and traditional

			designs shows inclusivity, making sure every student has access to facilities that meet their needs. More than just serving a basic function, these spaces also teach the value of hygiene, care, and respect for one another, which are important in shaping their everyday habits and character.
Others (Please specify.)		The school has a large covered court area. Though it is completely open, it has a wide roof that provides shelter from the sun and rain. The spacious floor includes basketball rings at both ends and a stage that can be used for school events. The court is wide enough to host various sports activities such as badminton, volleyball, and basketball, and it also serves as a venue for physical education classes and other school programs.	Yes, it will contribute to the students' learning and development because the covered court provides them with a place to be active, build teamwork, and develop their physical skills. Beyond sports, it also becomes a gathering space where students can come together for events, performances, and programs that strengthen school spirit. By having a venue that supports both physical activity and community, students not only stay active but also learn the value of cooperation, unity, and shared experiences that shape their growth.

An Observation Guide for the CLASSROOM VISIT

Read the following statements carefully. Then write your observation report on the space provided.

Guide question	Classroom Observation Report
1. Describe the community or	The community or neighborhood that surrounds the school is full of the things that can be beneficial or maybe helpful for the students.

Management
System
ISO 9001:2015

www.tuv.com
ID 9108653506

FS1

FIELD STUDY

ON BECOMING A TEACHER

Episode 1 The School Environment

neighborhood where the school is found.	There are many plenty of sari-sari stores, couple of xerox and printing shops, a café small, plenty of karinderya and more. The location of the school which is not near a busy road that makes it ideal for learning because there is minimal noise from vehicles passing by. There are also plenty of trees around inside and outside of the school, thus having a nice quality of air throughout the school.
2. Describe the school campus. What colours do you see? What is the condition of the buildings?	The school campus is colorful and vibrant, creating a setting that is pleasing to the eyes and uplifting to the spirit. The classrooms and buildings are predominantly white, accented with maroon linings that add a subtle yet elegant contrast. The buildings are well-maintained, ensuring that students feel safe, comfortable, and supported in their learning environment. During my visit, I also noticed a couple of ongoing construction projects, such as new pathways and a hallway. Once completed, these will greatly benefit the students, especially during the rainy season, by making movement around the campus easier and more convenient. Although the buildings show some age, they remain fully functional and continue to provide students with a conducive space for learning and growth.
3. Pass by the office is. What impression do you have of these offices?	The office is air-conditioned, it is very clean, and welcoming, it is giving off a sense of comfort and ease. This is important because a good learning environment should help students and teachers feel relaxed, safe, and ready to engage in learning. At the same time, the office reflects professionalism and formality, serving as the place where teachers and staff address concerns, share solutions, and discuss matters that support the school community.
4. Walk through the school halls, the library, the cafeteria. Look around and found out the other facilities that the school has.	The school provides plenty of comfort rooms aside from those located inside some classrooms. In total, there are eight CRs—four for males and four for females. This is a thoughtful and practical setup, as comfort rooms are essential to students' well-being and care. Since CRs can sometimes be out of order, having multiple facilities ensures that students will always have access to clean and functional restrooms when needed.

Episode 1 The School Environment

An Observation Guide for the CLASSROOM VISIT

Be guided by this task as you do your observation. Then accomplish the matrix to record your data.

CLASSROOM FACILITIES MATRIX

Classroom Facilities	Description (location, number, arrangement, condition)
1) Wall Displays	There are many wall displays on the classroom. As you enter the room, you'll find the bulletin board about Earth science that talks about Climate change though it is clearly looks old but still the message was clear. It brings awareness to the students on what is happening on our planet and that there is a need for a change in everyone. While on the right side of the classroom there is a shelf full of art creations made out of recyclable materials like bottles and papers. The most captivating in all the displays inside the classroom is its solar system themed ceiling. The solar system is clearly illustrated, and the use of the light bulbs as representation of stars is brilliant.
2) Teacher's Table	The teachers table is placed at the center infront of the classroom, it is neat, clean and also sturdy it is where the teacher placed his belongings as well as the learning materials that will be used in the class. The teachers table also use it as placement for the projector.
3) Learner's Desks	The students don't have learner's desks, instead they have has four tables combined to form two rows smartly placed at the center of the room so that each student don't have difficulties when listening and facing the teacher at front. The students sat on monoblucks chairs, though it is made of plastic, it they are very sturdy. Each students has enough space on their table to do their school works.
4) Blackboard	The classroom has a wide blackboard clear for every students to see even at the back. At the blackboard is divided into two parts, the two sides are regular blackboards meant for chalk writing. At the center there is a white board to write on with the use of white board marker. But its main purpose is to be a makeshift of projection screen, the surface that the projector is being flashed on. As I observe, it has a huge impact in delivering the

Episode 1 The School Environment

	lesson because it makes the projection of the lesson vividly for even those students at the back can able to see the lesson.
5) Learning Materials/Visual Aids	The classroom features a well-organized bookshelf stocked with a variety of books that students can freely borrow and enjoy reading during their spare time. Around the room, colorful visual aids add life to the room, from a bulletin board that talks about climate change to a solar system-themed ceiling. This brilliant design sparks curiosity and inspires students to keep exploring, learning, and growing.

Write your observation report here.

Name of this school observed: Abaño Laboratory School

Location of the school: J. Lukban Ext., Daet, Camarines Norte

Date of visit: September 3, 2025

My observation at Abaño Laboratory School went smoothly. At first, I felt a little nervous since it was my first classroom observation, but I was really happy and grateful to my resource teacher, Sir Kim, as well as the students, for making the experience positive. The Science teachers, especially Sir Kim, were very approachable and easy to find in their department office, where we could ask for guidance and tasks to assist with. They were accommodating not only to us FS students but also supportive of one another, which created a welcoming atmosphere. The students, on the other hand, were very lively and interactive. I often saw them spending their break time at the covered court, playing, chatting, and simply enjoying each other's company. The facilities are modern and well-organized. During my visit, there was some ongoing construction in the school, but it did not affect the quality of learning of the students. Comfort rooms are located across the campus with clear labels, and the Science Laboratory, along with other classrooms, is well-marked and easy to access. The school staff, from the guards at the gates to the canteen workers, were also polite and accommodating. Overall, Abaño Laboratory School gave me a comfortable and inviting environment that made my first observation truly meaningful.

Episode 1 The School Environment

ANALYZE

How did the school campus and school in particular impact the learning of these students going to school? What are the conclusions?

From what I observed, the campus of Abaño Laboratory School really supports the learning of students. The facilities are modern, organized, and easy to access, which makes it more convenient for them to move around and focus on their classes. Even with the ongoing construction, the learning process of the students was not disturbed, showing that the school is well-prepared to handle improvements without affecting education. The covered court also gives them a place to play, interact, and build social connections during their free time, which is important for their growth. Overall, the environment of the school is comfortable, safe, and welcoming, which has a positive impact on how the students learn and enjoy school life.

How does this relate to your knowledge of child and adolescent development? How does this relate to your knowledge of facilitating learning?

This connects to what I've learned about child and adolescent development because students need both a supportive learning environment and opportunities to socialize and express themselves. The school gives them a balance of academics and social interaction, which helps them grow not just intellectually but also emotionally and socially. In terms of facilitating learning, I realized that a well-structured and welcoming environment makes it easier for students to concentrate and stay motivated. It reminded me that as a future teacher, it's not just about what we teach inside the classroom but also how we make use of the school environment to support students' overall learning and development.

REFLECT

Management
System
ISO 9001:2015

www.tuv.com
ID 9108653506

FS1

FIELD STUDY

ON BECOMING A TEACHER

Episode 1 The School Environment

- 1) Would you like to teach in the school environment you just observe? Why? Why not?

Yes, I would love to teach in Abaño Laboratory School because I truly felt warmly welcomed, not only by the students but also by the teachers. The teachers were polite, professional, and very accommodating, always addressing us in the most respectful and kind manner. Despite their busy schedules, I noticed how they still carried themselves with positivity, even taking the time to share stories filled with humor. Seeing that made me realize how great of a teacher he was, someone who goes beyond just teaching lessons and becomes a source of inspiration. It made me reflect on the kind of teacher I want to be, not just someone who imparts knowledge, but also someone that inspire others to be more. Being in this kind of environment, surrounded by people who radiate warmth and professionalism, strengthens my desire to one day teach in a school like this.

- 2) What kind of school campus is conducive to learning?

A school campus that truly conducive or supports learning should be safe, clean, and well-maintained. It needs to be sure to create an environment where students feel comfortable, because comfort plays a big role in sparking their interest and motivation, which in turn helps them retain what they learn. A good campus also provides spaces that actively support growth, such as libraries for study, laboratories for discovery, cafeterias for nourishment, and recreational areas where both students and teachers can recharge and connect.

- 3) What kind of classroom is conducive to learning?

A classroom that truly supports learning should, above all, be welcoming and nurturing. Students need to feel safe, comfortable, and welcomed in order to develop a sense of belonging that makes learning both possible and enjoyable. Second, cleanliness and proper lighting are also important, as they allow learners to clearly see their books, notes, and the teacher's presentations. Third, it is vital to have good ventilation, which helps maintain focus by keeping the room comfortable. Fourth, a well-prepared classroom also provides the necessary learning tools and materials to support each lesson. Finally, a conducive classroom is one that minimizes distractions, stays reasonably quiet, and offers enough space for students to move freely and learn with ease.

Episode 1 The School Environment

- 4) In the future, how can you accomplish your answer in number 3?

In the future, I can accomplish this by becoming the kind of teacher who makes the classroom not just a place for lessons, but also a space where students feel safe and respected. I will keep my classroom clean and organized, make sure it is well ventilated and comfortable. I will use teaching tools that bring learning to life and more importantly, I will create an atmosphere where students feel that their voices matter, where mistakes are seen as part of growth, and where learning becomes something they can truly enjoy. By showing care, patience, and consistency, I believe I can build a classroom that students will not only learn from but also remember as a place where they felt they belonged.

- 5) Write your additional learnings and insights here.

Through this experience, I realized that teaching is more than just delivering lessons it is rather about creating an environment where students can feel valued, inspired, and supported. I learned that even the simplest gestures, like a warm smile or a kind word, can leave a lasting impact on learners. I also saw how important it is to balance professionalism with approachability, because students learn best when they feel both respected and understood. This observation helped me reflect on the teacher I want to become in the future, someone who not only guides students academically but also touches their lives in a way that encourages them to dream bigger. Most importantly, I came to understand that a school is not just a place of learning, but also a community where teachers and students grow together.

From among the board displays, that you saw pick the one that you got the most interested in. Evaluate it using the evaluation for below.

BOARD DISPLAYS EVALUATION FORM¹

Topic of the Board Display: Information board

Location of the Board Display in School: Science room grade 10

Cheque the call that indicates your rating. Write comments to back up your ratings.

4 - Outstanding 3 - Very Satisfactory 2 - Satisfactory 1 - Needs Improvement

Criteria	NI 1	S 2	VS 3	O 4	Comments
Effective Communication It conveys the message quickly and clearly.				√	The message on each board is clear and easy to understand. Important topics like climate change, gender awareness, and medical services are shared in a way that's straightforward and organized.
Attractiveness Colors and arrangement catch and hold interest.				√	The use of colors, visuals, and creative designs—like the Earth Science and Gender Development boards—really capture attention. These make the displays more engaging and inviting to look at.
Balance Objects are arranged so stability is perceived.			√		The elements are mostly arranged well, but some boards, like the Medical Services board, look a little crowded in certain parts. Adjusting spacing or layout could make it look more balanced.
Unity Repeated shapes or colors or use of off borders hold display together.			√		There is an effort to keep things uniform, but not all boards fully match in style. Different fonts and spacing affect the overall harmony of the displays.

Episode 1 The School Environment

Interactivity The style and approach entice learners to be involved in engage.				√	Boards like the Gender Development Corner are interactive since they include questions, real-life scenarios, and pictures of activities. These really help connect with the students.
Legibility Letters and illustrations can be seen from a good distance.				√	Most of the text is readable, but some parts—like the first board with smaller printed text behind glass—are harder to see from a distance. Bigger fonts or better contrast could improve this.
Correctness It is free from grammar errors, misspelled words, ambiguity.				√	The content looks correct and professional. I didn't see any spelling or grammar mistakes, and the information shared is accurate.
Durability It is well constructed. Items are securely attached.				√	The boards are sturdy and well-made. The laminated pages, tack boards, and secure attachments show they are designed to last.

ON BECOMING A TEACHER

Episode 1 The School Environment

Bulletin Board Evaluated by: Jay John C. Yasis		
Location: Science room grade 10		
Brief Description of the Bulletin Board: It presents information about climate change in a visually pleasing and attractive manner on-site.		
EVALUATION		
	STRENGTHS	WEAKNESSES
Description of the bulletin board layout.	The bulletin board is colorful, engaging, and visually appealing. The glittery "EARTH SCIENCE" title grabs attention right away, and the layout uses a mix of text, images, and cut-out designs that help make the topic feel alive. Everything is sectioned off clearly, which makes it easy to follow.	While the board is eye-catching, some of the elements already fall or fades off like the word "CLIMATE". Some parts of the text are quite small and might be hard to read unless you're standing close. The lighting from the window also creates a bit of glare, which could make visibility difficult at certain times of the day.
Evaluation of educational content and other aspects.	The content is timely and meaningful, it tackles climate change, which is an incredibly important and relevant topic. The board breaks down the issue into sections like causes, impacts, and actions we can take, which helps learners process the information in chunks. It also asks a powerful question: "Climate is changing, why aren't we?", that encourages reflection and discussion.	While the content is strong, it might be a bit too text-heavy for younger students or those who struggle with reading. The information could also be a little overwhelming at first glance, especially without clear visual cues guiding the flow from one section to another.
Recommendations or suggestions for improvement I suggest simplifying the title area so it doesn't look too crowded and all parts are easy to see. It would also help to use slightly larger fonts for the important sections to make them more readable, especially from a distance. Adding visual guides like arrows or numbers could be useful too, since they can lead the reader to follow the sections in the right order. Lastly, make sure the board is placed in a well-lit area without glare, or add a small spotlight to improve visibility.

ANALYZE

What do you think was the purpose of the board display?

The primary purpose of the board display is to serve as a central communication hub for the school community. It aims to provide up-to-date information on events, announcements, achievements, and other relevant news, fostering a sense of community and encouraging active participation from students, teachers, and staff. Additionally, it serves to celebrate accomplishments and inspire a love for learning.

Did the board display design reflect the likes/interests of its target audience? Why? Why not?

Yes, the board display design is intended to reflect the likes and interests of its target audience. The use of vibrant colors, clear organization, and diverse content categories is designed to appeal to a broad audience, including students, teachers, and staff. By highlighting student achievements and community events, the board aims to connect with the interests and values of the school community. The flexibility in color choices for different announcements also allows for personalization, making it more engaging for viewers.

What's the language used? Clear and simple for the target audience to understand. Why? Why not?

Yes, the language used is intended to be clear and simple for the target audience to understand. The use of straightforward language and concise descriptions ensures that the information is easily accessible to everyone, regardless of their background or reading level. This is particularly important in a school setting, where the audience includes students of varying ages and abilities.

Was the board display effective? Why? why not?

Yes, the board display is effective because it's eye-catching with its black background, colorful papers, and wooden frame. The color-coded system keeps everything organized, making information easy to find. It also covers different categories like events, staff announcements, student achievements, and community news, which makes it relevant to everyone. Plus, the long colored papers and plastic cover help protect it, so it lasts longer.

What suggestions can you make?

You can make the board better by adding interactive elements like QR codes that link to online resources. It would also be nice to change the theme from time to time to keep it fresh and interesting. Most importantly, the content should be updated regularly so it always stays current and relevant.

Episode 1 The School Environment

Based on your suggestions, proposed and enhanced version of the display board. Use the form below.

My Proposed Board Display

Theme: Blackboard with color coded infromations

Board Title: Information Board

Rationale:

This bulletin board design aims to be both eye-catching and useful, serving as an information center for the school. It helps build a sense of community and encourages participation from students, teachers, and staff. As an information board, it highlights announcements, achievements, and upcoming events, making information easy to access for everyone. The color-coded system keeps everything organized so people can quickly find what matters to them.

Objectives:

1. To provide up-to-date information on school events, announcements, and achievements in a clear, organized, and visually appealing manner.
2. To promote a sense of community and pride by highlighting school accomplishments, showcasing student work, and celebrating achievements.

Best features of my proposed bulletin enhancement:

The best features of my proposed bulletin board are the vibrant colors that make it attractive to students and the clear cover that helps protect it from damage, keeping the information neat and long-lasting.

FIELD STUDY

ON BECOMING A TEACHER

Episode 1 The School Environment

1. Events Calendar (Blue Paper): Displays all upcoming school events, deadlines, and important dates. Description: It will help students and staff stay informed about what's happening and plan accordingly.

2. Staff Announcements (Green Paper): Features important notices, updates, and achievements related to faculty and staff. Description: Keeps the staff informed and promotes a sense of recognition and appreciation.

3. Student Achievements (Yellow Paper): Showcases outstanding student work, awards, and accomplishments. Description: Celebrates student success and inspires others to strive for excellence.

4. Community News (Orange Paper): Includes information about local events, volunteer opportunities, and community partnerships. Description: Connects the school with the broader community and encourages participation in local activities.

5. General Announcements (Red Paper): Covers any other important information, such as policy changes, safety updates, and general notices. Description: Ensures that all critical information is communicated effectively.

(Note: The color of the paper used for each category can be adapted based on personal preference or the specific needs of the school.)

Materials for aesthetic enhancement:

- Wooden frame or border
- Black chalkboard paint for the background
- Long colored papers
- Push pins or tacks
- Clear plastic cover (protects the display from damage and fading)
- Optional: Decorative elements such as ribbons, stickers, or cut-out shapes

Episode 1 The School Environment

REFLECT

- 1) Name at least five years that a teacher should have to be able to come up with effective board displays. Elaborate on why each skill is needed.

I think a teacher needs **creativity** to design boards that catch attention, **organization** to keep the layout neat and easy to follow, and **communication** to clearly express messages. It's also important to have an **understanding of the audience** so the content connects with students, and **basic design/layout skills** to balance colors, space, and elements for readability.

- 2) Which of the skills your name in number one do you already have? Recall your past experiences in making board displays. How do you practice these skills?

As I assess myself, I believe I already have creativity, organization, and an understanding of my audience. Whenever I make board displays, I always think about what would catch my eye as a student. I enjoy playing with colors and themes. For example, back in Grade 12, my teacher asked us to create a birthday board with cupcakes and balloons for each month, and our class really loved checking it every day. I practice these skills by observing other displays, getting ideas from different places, and reflecting on what worked well.

- 3) Which skills do you still need to develop? What concrete steps will you take on how you can improve on or acquire these skills?

I still want to improve my design/layout skills and visual communication. Sometimes the ideas I imagine don't turn out as clean as I would like. To work on this, I plan to watch tutorials on basic design, ask feedback from others, sketch drafts before putting things up, and look at other classroom boards for inspiration. For me, the goal is to keep improving little by little and build more confidence each time I create a display.

SHOW Your Learning Artifacts

My Personal Illustration of an Effective School Environment

Let your Creativity
Shine!

On the opposite
box, present an
illustration
showing your idea
of an effective
school
environment
through any of
these:

- A Descriptive Paragraph
- A Photo Essay
- A Sketch or Drawing
- A poem, song or rap

For me, an effective school environment always begins with safety. A school should be a place where students feel secure the moment they enter the gate. Safety is not only about having guards or proper facilities, but also about giving students peace of mind that they are protected and cared for. When students know they are safe, they can focus better on their studies and enjoy their time in school without unnecessary worries.

Connected to this is the idea of being **bully-free**. Bullying destroys the joy of going to school and can deeply affect a student's confidence, emotions, and even their future. An effective school environment is one where every student is accepted, respected, and treated fairly. It is a place where kindness is encouraged, and where teachers, staff, and classmates all work together to make sure no one feels left out or hurt. In this way, the school becomes not just a learning place but also a second home.

Another important part of an effective school is that it does not only focus on **academic excellence** but also gives attention to students' **mental health**. While grades and lessons are important, students also need support in handling stress, emotions, and the challenges they face every day. A good school should have activities, programs, and teachers who look after the overall well-being of students. When mental health is prioritized, students grow not only smarter but also stronger, healthier, and more balanced in life.

Lastly, I believe an effective school is one that leaves a **positive and lasting impact** on its students. Even after many years have passed, the values and lessons learned in that school should still remain. It is the kind of school that shapes not just what students know, but also who they become. The memories, the guidance, and the values they gained will continue to guide them through life.

In my idea, an effective school environment is safe, bully-free, supportive of mental health, and leaves a lasting mark on its students. It is a place where learning goes beyond books and exams, it becomes a foundation for life.
