OBSERVATIONS OF TEACHING -LEARNING IN ACTUAL SCHOOL ENVIRONMENT

Episode 15 – Towards Teacher Quality: Developing a Glocal Teacher of the 21st Century

SPARK Your Interest

Moving towards teacher quality? Wanted! A Global Teacher of the 21st Century!

In 2013, a Global Status Index was determined by the Varkey GEMS Foundation and revealed significant findings. There were 21 countries surveyed which represented the major continents of the world. In most countries that participated, it was found out that like the Philippines, teaching is the most sought profession. It was comparable to being a social worker, librarian, nurse, and even doctor. The majority of the parents asked, answered that they encourage their children to become teachers. To them, teaching is one of the most respected and trusted professions.

However, with the change in the global landscape, 21st-century teachers must have the competence to address the new learning environment, the new learning contents, the processes of learning and how these are facilitated, and the new types of learners.

Hence, we need a new type of teacher, a glocal 21st century Filipino teacher.

(Global Teacher Status Index p. 123 Teaching Profession)

TARGET Your Intended Learning

At the end of this episode, I must be able to:

- describe the personal qualities and competencies of glocal classroom teachers of the 21st century; and
- design a learner-centered classroom for 21st-century learners with safe learning spaces, that allow creativity and use of ICT.

OBSERVATIONS OF TEACHING -LEARNING IN ACTUAL SCHOOL ENVIRONMENT

Episode 15 – Towards Teacher Quality: Developing a Glocal Teacher of the 21st Century

FILIPINO GLOCAL TEACHER

A survey of the ASEAN countries and beyond tends to show that there are three major responsibilities of teachers. These are (1) Actual Teaching. (2) Management of Learning and (3) Administrative Work.

While the number of actual teaching hours per day varies all over the world, in our country, teaching in public schools requires six hours of actual teaching, which includes administrative work such as management of learning per day. The two hours of the working day are allotted to administrative work such as scoring and recording learners' outputs, making reports, filling forms, preparing for the next day's activity, and performing other administrative tasks. The previous Episode on the teacher reminded us of the qualities and competencies mentioned earlier. Teachers should be multi-literate, multi-cultural, multi-talented, innovative and creative. The future Filipino teacher like you shall act locally but think globally.

“Teach local, reach global” means that the teacher brings diverse experiences in the classroom with the various skills to live and work as citizens of a global society. What teachers do in the local communities impacts the larger community. As global citizens, the work begins, where the teachers are, thus a “glocal” teacher.

Towards Quality Glocal Teachers

Quality teachers are characterized by different attributes and skills needed in 21st-century education. Partnership 21 identified (1) Global awareness, (2) Financial, economic, business, and entrepreneurial literacy, and (4) Civic and Health Literacy which require:

1. Learning and Innovative skills.
2. Information, Media and Technology Skills
3. Life and Career Skills

More specifically, quality teachers are competent teachers who can demonstrate exemplary mastery of knowledge, skills, values, and dispositions relative to the following characteristics:

1. Understand one's own cultural identity and rootedness
2. Knows and integrates global dimensions in the subject area
3. Engages learners in the learning processes
4. Uses real-life local and global examples
5. Values the inputs of culturally and linguistically diverse learners
6. Models social responsibilities in local and global content

OBSERVATIONS OF TEACHING -LEARNING IN ACTUAL SCHOOL ENVIRONMENT

Episode 15 – Towards Teacher Quality: Developing a Glocal Teacher of the 21st Century

7. Encourages learners to find appropriate actions to improve local and global the conditions, and
8. Creates a learning environment that encourages creativity and innovations.

The Challenges of the Quality Glocal Teachers for the 21st Century

One of the major challenges of quality teachers is to “create a learning environment that encourages creativity and innovation among learners.” With it, comes the management of learning in such environment. These are required skills for a global teacher.

Majority of the current classrooms provide learning spaces that can hardly prepare the 21st century learners for the development of the 21st century skills.

Since the 21st century classroom is learner-centered, the teacher acts as a facilitator of learning. Students no longer study each subject in isolation, but they work on interdisciplinary projects that cover several subject areas. Learning is no longer for memorizing and recalling of information but on learning how to learn. Thus classroom designs should respond to the 21st century learning. More so, quality teachers should be changing their roles from teaching in isolation to co-teaching, team teaching and collaboration with students and peers.

A new and creative design of classrooms by the teachers is needed as well as the management of learning. These are the two teacher qualities needed to address the new roles of teachers.

How should a new classroom be? Here are some suggestions on the six elements of a new classroom:

1. Flexibility of furniture and space
2. Collaborative learning
3. Facilitation of movement
4. Foster creativity
5. Use of technology
6. Provision of light and bright colors

With the classroom structure, a quality teacher should be able to manage learning under a very conducive learning environment. Teacher should use effective classroom management strategies that will ensure productive learning.

OBSERVATIONS OF TEACHING -LEARNING IN ACTUAL SCHOOL ENVIRONMENT

Episode 15 – Towards Teacher Quality: Developing a Global Teacher of the 21st Century

Quality teachers should manage learning in an enhanced classroom by seeing to it that learners are

- organized,
- orderly,
- focused,
- attentive,
- on task, and
- are learning.

This will take much of your skill, experience, and patience. The two important factors that may affect learning management are the use of technology and the diversity of learners.

OBSERVE, ANALYZE, REFLECT

Activity 15.1

A Day in the School Life of a Quality Teacher

Resource Teacher: **Sir Kim Paolo Armin A. Torcelino VI** Teacher's Signature: 

School: **Abaño Laboratory** Grade/Year Level: **10** Subject Area: **Science** Date: **09/30/25**

Observation 1: This activity will require you to stay in school for one school day. Special arrangements by your faculty should be made for this purpose.

Procedure

1. Secure a permit to observe a quality teacher in the school for one whole class day.
2. Shadow the teacher in the three major responsibilities.
 - Actual Teaching
 - Management of Learning
 - Administrative Work
3. Use the key guide found in the matrix below.
4. Record data observed in your notebook. This will be your artifact.
5. If you missed seeing the evidence in the key guide, you may interview the teacher.
6. Make a narrative or essay of your answer entitled: "A Day in the School Life of a Quality Teacher".
7. If permitted, you may include the teacher's picture in action in your essay.

OBSERVATIONS OF TEACHING -LEARNING IN ACTUAL SCHOOL ENVIRONMENT

Episode 15 – Towards Teacher Quality: Developing a Global Teacher of the 21st Century

OBSERVE

Note: Observe and record observations on the following aspects as key guide to observations.

Teacher's Major Responsibility	Key Guide for Observation (Carefully look for the indicators/behaviors of the teacher along the key points. Write your observations and description in your notebook. This will be one of our artifacts.)
A. Actual Teaching	This teacher 1. is learner-centered. 2. acts as a facilitator of learning. 3. has mastery of subject matter. 4. sees to it that learning outcomes are achieved. 5. is pleasant and fair in dealing with the learners.
B. Management of Learning	This teacher 1. allows all learners to participate in the lesson. 2. <u>Consider the needs of the learners in the seating arrangement.</u> – <u>No they doesn't have fixed seating arrangements</u> 3. Use instructional support materials to help learners understand the lesson. 4. sees to it that learning is achieved within a period. 5. dismisses the class on time.
C. Administrative Work	This teacher 1. keeps records of learners' attendance every day. 2. <u>keeps a record of formative and summative tests.</u> – <u>No only summative tests based on my observation.</u> 3. submits reports and other documents on time. 4. does other tasks as requested by superiors. 5. cooperates with peers and staff in the cleanliness and safety of the school.

ANALYZE

Refer to the results of your observation to answer the questions that follow.

1. Which of the three responsibilities shows majority of the indicators being practiced?

FIELD STUDY

OBSERVATIONS OF TEACHING -LEARNING IN ACTUAL SCHOOL ENVIRONMENT

Episode 15 – Towards Teacher Quality: Developing a Global Teacher of the 21st Century

- A. Actual Teaching?
- B. Management of Learning?
- C. Administrative Work?

For me, it is Actual Teaching because all the indicators were very evident during my observation. The teacher was learner-centered, making sure that the students were actively involved in the lesson rather than just listening passively. He acted as a facilitator by guiding discussions and encouraging us to think critically instead of simply giving direct answers. It is also very evident that he has the mastery of the subject matter, which made the lesson smooth and clear for the learners. What impressed me the most was how she remained pleasant and fair in dealing with everyone, treating the students equally and showing respect regardless of their behavior or level of understanding. This made the classroom atmosphere positive and supportive, which I think is a big factor in why learning was effective.

2. Which demonstrated behavior, do you find in the teacher that is worthy of emulation when you become a teacher? Describe.

For me, the behavior that I really want to emulate is how the teacher is pleasant and fair in dealing with learners, because that shows a high level of discipline and patience which I am somehow lacking. I admire this because it shows that no matter what kind of student you handle, whether they are active, shy, struggling, or excelling, showing fairness and respect creates a safe and supportive classroom. This way, students are not afraid to participate, ask questions, or even make mistakes. For me, this is a behavior that truly builds trust and confidence in the classroom, and it's something I would like to practice when I become a teacher myself in the future.

3. Which of the major responsibilities does this teacher find difficult to comply with? What are the reasons?

I think the teacher finds Administrative Work a bit difficult to comply with, especially in keeping complete records of both formative and summative tests. Based on my observation, only summative tests were consistently recorded, while formative activities were not. This might be because of the heavy workload and time constraints teachers face, since checking and documenting every single activity can be very demanding. It is also possible that the teacher prioritizes summative records because they are more formally required in reports. Still, this shows that even dedicated teachers sometimes struggle with the extra paperwork that comes with the profession.

OBSERVATIONS OF TEACHING -LEARNING IN ACTUAL SCHOOL ENVIRONMENT

Episode 15 – Towards Teacher Quality: Developing a Global Teacher of the 21st Century

4. From your perspective, would you consider this teacher as quality teacher? Why?

Yes, I would consider this teacher as a quality teacher because despite the small lapses he may have, his teaching and management of learning were very strong. He showed dedication not only in mastering the subject but also in making sure that students were actively engaged. For me, what makes him a quality teacher is not perfection in every task, but the way he prioritizes student learning and ensures that outcomes are achieved. His ability to balance fairness and effective teaching strategies proves his commitment to his role, and that is what makes him a true example of being a quality teacher.

Now, that you have spent one school day to observe this teacher, it would be good for you to reflect on all your observations by answering reflective questions below.

1. Are you inspired to become a teacher after your observation? If yes, why? If No, why not?

Yes, and even though I have a little doubt on myself if I can make it, I was still inspired to become a teacher after my observation because I was able to see how the teachers can truly influence the students' life not just academically, but also personally. Watching how the resource teacher handled her class with patience and fairness made me want to follow the same path, because I also want to inspire and guide students in the future.

2. When you become a teacher in the future, how else would you do better as a professional teacher?

When I become a teacher in the future, I will surely make the most of what is the available resources around me. I will push myself to gain more and new knowledge to help me improve my teaching. I will try to do better in balancing all three responsibilities the actual teaching, management of learning, and administrative work. At the same time, I want to use creative teaching strategies and integrate technology to make my lessons more engaging to my future students. By improving in these areas, I hope to provide my students with quality learning experiences while still being organized as a professional teacher.

OBSERVATIONS OF TEACHING -LEARNING IN ACTUAL SCHOOL ENVIRONMENT

Episode 15 – Towards Teacher Quality: Developing a Global Teacher of the 21st Century

3. What are some of the concerns that you foresee in the future as a quality teacher? Do you think you will be ready to address these? Give at least 2 concerns.

One concern I foresee is managing the diverse needs of students, especially since every learner has a different pace, ability, and background. For me, this is going to be challenging, but I am willing to prepare myself by learning more teaching strategies and practicing patience. I can also do the “Differentiated Instruction Approach” which the resource teacher used to address students’ diverse learning needs. Another concern is handling the heavy workload of administrative tasks while still giving my best in teaching. This might be overwhelming for me, but I believe that with proper time management and dedication, I will be able to handle it. These concerns are not easy, but I am confident that with passion and continuous growth, I will be ready to face them.

4. In what aspects of the teacher’s day, would you like to congratulate the teacher you observed? Can you show your appreciation to this teacher by sending a Thank you card? (Include this in your artifact)

I would like to congratulate the teacher I observed for his consistency and dedication in teaching. He handled his subject with mastery, made the students actively participate, and ensured that the classroom was a safe and comfortable space for learning. Despite the challenges, he still managed to fulfill his responsibilities with commitment. To show my appreciation, I would like to give him a Thank You card to let him know how much his effort and guidance meant to me as a student observer. It is undeniable that most of the time, teachers don’t hear enough gratitude for the work they do, so I want him to know that his hard work and patience are truly valued.

OBSERVATIONS OF TEACHING -LEARNING IN ACTUAL SCHOOL ENVIRONMENT

Episode 15 – Towards Teacher Quality: Developing a Global Teacher of the 21st Century

Make a comparison of your drawings A and B. Describe the similarities and differences. Explain why.

Features of the Present Classroom Component	My Vision of the Future Classroom	Why the similarity? Why the differences?
It has air conditioner. It has ventilation Fan. It has 1 restroom. It has a water dispenser. It has a storage for shoes.	It has air conditioner. It has ventilation Fan. It has 1 restroom. It has a water dispenser. It has a storage for shoes. It has a bully box. It has TV. It has a couple of book shelves. It has an information bulletin. It has some plants It has Laboratory equipment.	Both the present and my envisioned future classroom share common features like an air conditioner, ventilation fan, restroom, water dispenser, and shoe storage because these promote comfort, cleanliness, and convenience, allowing students to focus and learn better. However, my vision adds new elements such as a bully box, TV, bookshelves, information bulletin, plants, and laboratory equipment. These differences reflect my desire for a more engaging, supportive, and holistic learning environment. The bully box ensures emotional safety to my students, the TV and bookshelves promote interactive and independent learning, the bulletin strengthens communication, the plants bring life and calmness, and the lab tools support hands-on science exploration. In short, while the basic structure remains the same for practicality, the additional features represent my vision of a classroom that goes beyond academics, one that nurtures both the mind and the heart.

Episode 15 – Towards Teacher Quality: Developing a Glocal Teacher of the 21st Century

Based on the task that you made, what challenges await you as a future teacher? How will you manage learning in the future classroom? How will you prepare yourself to respond to 21st teaching-learning and become a glocal teacher?

Make a short paragraph on how will you manage teaching-learning in the 21st century classroom?

Based on the task I made, I realized that being a teacher comes with many challenges, especially in keeping up with the fast changes in technology and the diverse needs of students. I know that in the future, managing learning in the classroom won't just be about teaching lessons, it is about creating a safe, inclusive, and engaging space where every student feels valued. I know there will be challenges like balancing digital tools with real human connection or handling students with different learning paces, but I believe preparation and adaptability are key. For me to respond to 21st-century teaching, I will continue learning new strategies, integrating technology wisely, and promoting collaboration and critical thinking among students. As a future "Glocal" teacher, I want to connect global ideas with local values, teaching students to think big but stay grounded in their culture and community.
