ON BECOMING A TEACHER

Episode 4 Learner Diversity: The Community and Home Environment

THE K TO 12 GRADING SYSTEM

SPARK Your Interest

Episode 4 provides opportunities for youth and more in depth. Look into the factors that affect the development of a learner. Focus will be on the early experiences and characteristics of the learner as described by the family and other significant others. You also focus on how the teacher links with the community to maximize the learning and development of students.

TARGET Your Intended Learning

Outcome

At the end of this episode, I must be able to:

- Describe the influencing factors in the home environment that affect the students learning;
- Take advice concerning strategies that build relationships with parents or guardians and the wider community (6.2.1); and
- Identify effective strategies on how teachers can work with each other with the family.

REVISIT the Learning Essentials

1. Urie Bronfenbrenner's bio-ecological model presents the learner within the context of layers of nation ship systems that make up the learners' environment. The layers are:

Microsystem -includes the structures such as once family is cool and neighborhood.	Mesosystem - the connection between the structures in the microsystem.	Exosystem - the the bigger social system which includes the city government, the workplace and the mass media.	Macrosystem - outermost layer, which includes cultural values, customs, and laws.	Chronosystem - the element of time patterns of stability and pacing of the child's everyday life.

ON BECOMING A TEACHER

Episode 4 Learner Diversity: The Community and Home Environment

THE K TO 12 GRADING SYSTEM

The model helps the picture looked into every aspect in the learners environment to understand his behavior. That features important role is not to replace what is missing at home (If any), but to work so that the school becomes an environment that welcomes and nurtures families. The teacher works to create a partnership with the family and community to bring out the best in every learner.

2. Baumrind's Parenting Styles

- a. **Authoritarian.** Parents are very firm with their children and expect unwavering and unquestioning obedience. Rules are, sadly parents and misbehavior is smelled weird. Withdrawal of affection, physical punishment or threats
- b. **Permissive.** Parents are not fear or controlling. They have few expectations, maybe warm and caring, but appear to be uninvolved and uninterested.
- c. **Rejecting-neglecting.** Parents are disengaged from children. Neither demanding nor responsive to children.
- d. **Children of:**
- e. **Authoritarian parents:** are often unhappy, fearful, withdrawn, inhibited, hostile, and angry and aggressive. They have low self-esteem and difficulty with peers.
- f. **Permissive parents:** believe that their parents do not care for them. They are often impulsive, aggressive and lack self-control. May they have low levels of independence and responsibility.
- g. **Rejecting-neglecting parents.** Are found to be the least competent in their overall functioning and adjustment.
- h. **Authoritative Parents:** are used are socially competent, self-reliant, and have greater ability to show self-control. They have higher self-esteem and are better adjusted.

- Based on child development by SANTROCK 2004.

OBSERVE, ANALYZE,

Activity 4.1

Observing the learner's community and home environment.

Name of FS Student: Jay John C. Yasis

Course: BSED-Sciences

Year and Section: 4th Year – Block A

Resource Teacher 1: Sir Kim Paolo Armin A. Torcelino VI

Signature: _____

Date: 9/12/25

To realize the **Intended Learning Outcomes**, where you're always through these steps:

1. Select a learner from the class which you have previously observed
2. Interview the teacher about the learner's characteristics and the community.
3. Conduct a home visit to your selected learners' residence.
4. Interview the parents about.
 - a. The rules they implement at home concerning their child's schooling.
 - b. The learners, activities, and behavior while at home.
5. Write the learner's profile.
6. Analyzed observation and interview data.
7. Reflect on your observation experience.

OBSERVE

Use the **activity form** provided for you to document your observations.

An Observation/Interview Guide for the Home-School Link

Read the following carefully before you begin to observe/interview. Then write your observation report on the space provided on the next page.

The Learner

- 1) Make a general observation of the learner. Describe him or her in each of the domains of development:
 - physical-body build and height (thin, chubby, underweight, overweight), level of physical activity (fast, slow, lethargic, active, etc.)
 - social interaction with teachers and classmates (loner, shy, sociable, friendly, gets into fights, like by others, etc.)
 - emotional moods, temperament, cries easily, loses temper, happy, shows enthusiasm, excited, indifferent etc.
 - cognitive (appears to understand lessons, copes with the lessons, excels, lags behind, shows reasoning skills, turn in assignments, and requirements, etc.)

Interview the Teacher

- 1) What are the most noticeable characteristics of the learner? (emotional disposition, behavior and discipline, sense of responsibility, study habits, academic performance, relationship with peers, relationship with adults, social adjustment)
- 2) How does the teacher communicate with the parents? how often? what do they discuss? How do they decide on the best course of action to resolve issues or problems?
- 3) How does the teacher utilize resources in the community to support the teaching-learning process? How does the teacher work with the community to meet the needs of the learners?

Interview with parents

- 1) Conduct a home visit. Once there observed the home set up. (home is orderly, family pictures in the living room, etc.)
- 2) Use the interview questions on the next page. Just ask the questions with which you feel comfortable.

Suggested parent interview guide

Your teacher may ask you to use a more detailed interview guide. Be free to translate the questions if necessary.

ON BECOMING A TEACHER

Episode 4 Learner Diversity: The Community and Home Environment

THE K TO 12 GRADING SYSTEM

Name of Learner: Eionne Fanta H. Ordinario	
Date of Birth: June 8, 2010	Age: 15 years old
Grade/Year Level: Grade 10	Gender: Female
Number of Siblings: 1	
Birth Order: Youngest / Second	
Parents: Mother: Esteniejade N. Ordinario Age: 40 Occupation: Freelancer Educational Attainment: College(undergraduate) Father: Jovi John C. Ordinario Age: 38 Occupation: CNC Operator Educational Attainment: College graduate	
Learner's Physical Aspect: Health 1) Mothers' health during pregnancy with the learner: Although it was a normal delivery. Mrs. Ordinario experienced high blood pressure during pregnancy. 2) Ailments or health problems of the learner as a child: None. 3) Age of the learner when he/she started to walk or talk: She was one year old when she learned how to walk, and between the ages of one and two, she began to speak. 4) Food preferences of the learner as a child and at present: Jollibee 5) Who took care of him or her as a child? Her grandparents.	
Learner's Social Aspect: 1) Describe your child sociability (friendly, outgoing or shy, loner): When choosing friends, she is very selective. 2) Who were the learner's playmates? Her friends. 3) As a child then, was he or she allowed to play outside? Yes, always. 4) Is he or she allowed to go out with friends? Yes, with permission. 5) Do you have rules for him or her to follow regarding going out? Yes. 6) What are these rules? She must ask for permission, must come on time and she must inform where she is going.	
Emotional-Moral 1) What are your expectations of the child? Do well in school, be respectful, be responsible and be independent. 2) How do you provide a nurturing environment for your child? By praise or compliments, rewards and verbal motivation. 3) Does your child go to you when she or he feels down or has a problem? What do you do to meet her or his emotional needs? Sometimes. 4) What do you do when he or she is not successful in something? Offer help, give advice and encourage her to try again.	
How do you discipline your children? 1) Do you have rules in the House? What are they? Yes, these are: 1. Chores must be done and 2. Respect elders. 2) How do you impose the rules? Reminders only. 3) What are the consequences of breaking the rules? No gadgets and no Wi-Fi.	
Learners' Cognitive Aspect: 1) What are the child's interests? Reading, writing and playing with her gadget. 2) What is he or she good at in school? English.

- 3) In what subject/s does he or she have difficulty? **Math.**
- 4) How do you monitor his or her performance in school? How do you motivate him or her? **By checking her report card.**
- 5) Do you have rules at home to help him develop good study habits? **By praising her and giving her rewards.**
- 6) What are these rules? How are they implemented? **None.**

After you have gathered all the necessary data. Write the learner's development profile using the outline below, type the profile on a separate sheet and attach it to this learning episode.

THE LEARNER'S DEVELOPMENT PROFILE (Outline)

Name of the Learner: **Eionne Fanta H. Ordinario**
School: **Abaño Laboratory School**
Date of Home Visit: **Sept. 12, 2025**
Date of Birth: **June 8, 2010** Age: **15 years old**
Grade/Year Level: **Grade 10** Gender: **Female**

Family Profile

Number of siblings: **1**
Birth order: **Youngest / Second**
Parent
Mother: **Esteniejade N. Ordinario** Age: **40**
Occupation: **Freelancer** Educational Attainment: **College(undergraduate)**
Father: **Jovi John C. Ordinario** Age: **38**
Occupation: **CNC Operator** Educational Attainment: **College graduate**

Physical Development

In paragraph form describe the physical development of the learner. Combine the teacher's, parents' responses and your own observations.

Based on my observation, the learner shows normal physical development. Her mother shared that although her delivery was normal, she experienced high blood pressure during pregnancy. The learner was one year old when she started to walk, and between ages of one and two when she began to talk. At present, her growth is typical, and she has no serious health problems. Although she is slim, she appears to be healthy.

Social Development

In paragraph form describe the social development of the learner. Combine the teacher's, parents' responses and your own observations.

According to Ms. Eionne, She is selective when it comes to choosing friends, but once she feels comfortable, she is friendly and approachable. Her parents mentioned that she usually plays and spends time with her peers, especially her close friends. She is allowed to go outside to play, but only with permission.

FS1

FIELD STUDY

ON BECOMING A TEACHER

Episode 4 Learner Diversity: The Community and Home Environment

THE K TO 12 GRADING SYSTEM

Emotional-Moral Development

In paragraph form describe the emotional-moral development of the learner. Combine the teacher's, parents' responses and your own observations.

Ms. Eionne is described as respectful, responsible, and independent. At school, she knows how to behave well and follows instructions. She sometimes needs reminders when she struggles with something, but encouragement and advice push her to try again. I also noticed that she is able to handle failures by listening to feedback and using it to improve herself. Morally, she follows household rules such as doing chores and respecting elders, showing that she has developed discipline and accountability.

Cognitive Development

In paragraph form describe the cognitive development of the learner. Combine the teacher's, parents' responses and your own observations.

In academics, Ms. Eionne excels in English, where she performs well and shows confidence. However, she experiences some difficulty in Math, which her parents also confirmed. Her parents monitor her performance by checking her report card. She has good study habits, though her parents admitted they do not impose strict study rules at home. From my observation, she is able to focus on tasks given to her, enjoys reading and can express her ideas clearly. Her cognitive development is strong, though she needs extra support in subjects where she struggles.

Findings

Write here your salient findings about the learner.

Ms. Eionne demonstrates well-rounded development. Physically, she grew normally without major health issues. Socially, she is friendly but selective, preferring close bonds. Emotionally and morally, she is respectful, independent. Cognitively, she shows strength in English and reading but struggles in Math, which needs attention. Her parents' support and guidance, as well as school activities, both play a big role in her development.

Conclusions

Write your conclusions after you have analyzed the impact of the school and the home on the learner's development. The questions in the Your Analysis portion of this learning Episode can help you.

Ms. Eionne's development is a result of both school and home working together. At home, the guidance and encouragement of her parents, help her become disciplined, responsible, and independent. At school, her teachers provide opportunities for her to learn, interact, and showcase her abilities. The challenges she faces in Math show that learners can develop unevenly across different areas, but with proper support from both home and school, she is able to cope. The balance of guidance, encouragement, and freedom shapes her into a confident and responsible learner.

Recommendations

Write your recommendations.

Management
System
ISO 9001:2015
www.tuv.com
ID 9108653506

FS1

FIELD STUDY

ON BECOMING A TEACHER

Episode 4 Learner Diversity: The Community and Home Environment

THE K TO 12 GRADING SYSTEM

Based on my observation, I recommend that Ms. Eionne must be given additional support in Mathematics like extra practice, to strengthen her weak areas. Parents and teachers should continue giving praise and encouragement to boost her confidence. Since she learns well with guidance, providing structured routines and study habits at home may further improve her academic performance. Encouraging her to join more social activities can also help her build wider connections and improve her interpersonal skills. Finally, continued cooperation between home and school will ensure her holistic growth and development.

ANALYZE

Your findings and recommendations in the learner development profile will help you answer the following questions here.

- 1) From your home. Visit and interview. What do you think? Is this style of parenting experience by the teacher? Explain your answer.

Since we were not able to conduct an actual home visit due to some problems, we instead gave a survey sheet that the student answered together with her parent in their house. Based on the responses, I can say that the style of parenting is also reflected in how sir Kim handles his students. Parents guide their children with patience and encouragement, even praising their child when they did something good, and this is similar to how sir Kim supports Ms. Eionne together with all her classmates with the kindest approach. Which motivates them, and helping them grow without making them feel embarrassed.

- 2) Relating your data with what you learned from child development, what family factors do you think contribute to the development and over-all adjustment of the learner in school?

From the survey answers, family support and involvement really stand out. Parents who show guidance, provide encouragement, and communicate well with their child help them adjust better in school. The way Ms. Eionne's parents set discipline at home also shapes how the learner follows rules and routines in class.

- 3) Does the communication between the homes-school have an effect on the learner. If yes, what are these effects?

Yes, and this was clear even in the survey answers. Good communication between the home and school makes the learner feel supported from both sides. It helps address problems early, whether academic or behavioral, and it also builds consistency between what parents expect

Management

FS1

FIELD STUDY

ON BECOMING A TEACHER

Episode 4 Learner Diversity: The Community and Home Environment

THE K TO 12 GRADING SYSTEM

at home and what teachers expect at school. This way, the learner feels more guided and secure in their learning journey with the learner.

- 4) How can the teacher partner with the community to contribute to the development and learning of the students? Who are the people or which institutions can the teacher tap to seek advice regarding the development and learning of students?

Even if we only gathered data through survey sheets, it is clear that the community also plays an important role. Teachers can partner with barangay officials, parents, and local organizations to strengthen programs that support students' needs. They can also tap health workers, guidance counselors, and even NGOs for advice and support in areas like student well-being, safety, and development. These partnerships give students more opportunities to grow not only in academics but also in values and life skills.

REFLECT

- 1) Reflect on your own development as a child. What type of parenting did you experience? How did it affect you?

The type of parenting that I experience when I was a child is somewhat an Authoritative Parenting. This type of parenting has high levels of both control and warmth. Which means, parents set clear rules and expectations while also being supportive, responsive, and providing a nurturing environment. When I was a child, I remember my mother always reminds me on how should I behave in places like church and others. I also feel how much they love me, although they also give me punishments when I did something bad. Those experiences affected me in I way that, when I was growing up, I always think of what will be the outcome of my decision. I would often ask myself, "What will my mother feel or think if I do this or that?". Because of this, I often end up making the right decision. My parents taught me to be a well-rounded person and always think carefully before making any decision which helped me become who I am now.

- 2) As a future teacher, how would you establish good home-school collaboration? How can you work well with the parents? How can you help them? How can they help you?

As a future teacher, I would establish good home-school collaboration by making sure that communication with parents is open and consistent. This can be done through regular updates, either by giving notes, sending messages, or holding parent-teacher meetings where we can discuss the child's progress or if there are any concerns regarding the children. I would also make my classroom a welcoming space for parents, so they feel that they are truly partners in their child's education.

I think I can work well with parents by listening to their concerns and respecting their insights, since they know their child best at home. I can help them by giving suggestions on how they can

support their child's learning at home, like creating a study routine or providing simple enrichment activities. On the other hand, they can also help me by reinforcing the values and routines we practice in school, so that the learner gets consistent guidance both at home and in class. By supporting each other, both me and the parents can give the learner the best chance to succeed academically, emotionally, and socially.

SHOW Your Learning Artifacts

1

My art reflects how the learner's growth is shaped by the combined influence of home, school, and community. Family figure on the right shows that the family gives love, guidance, and values that become the learner's foundation. While the book and school building on the left, represents the school provides knowledge, discipline, and opportunities to explore their potential with the help of teachers and classmates. While the community represents culture, support, and real-life experiences that mold the learner's character. These three are clearly important elements that work together that give one learning journey, ensuring that the learner not only succeeds academically but also develops good values and strong relationships to the people around him/her as well.

2
